Playing as Black in a game of chess can be difficult. Do you simply try to neutralize White's initiative, or go all-out to complicate the game? Either way, there are many pitfalls, and a lot of study may be needed. Eingorn recommends ideas and move-orders that are a little off the beaten track, but which he has very carefully worked out over many years of his own practice. The repertoire, based on playing 1...e6, is strikingly creative and will appeal to those who want a stress-free life as Black. You will get every chance to demonstrate your chess skills, and are very unlikely to be blown off the board by a sharp prepared line. All you need is a flexible approach, and a willingness to try out new structures and ideas.
