

## Play the Alekhine

Valentin Bogdanov

- A life-long specialist explains an uncompromising chess opening
- Popular opening for club-players and tournament players
- Coverage for players of the black or white pieces

**GAMBIT**

The Alekhine is arguably the most forcing and aggressive reply to 1 e4. Black immediately forces the pace and drags the game onto his own favoured territory. This strategy is not without risk, but those who specialize in the Alekhine find that the opening has a real practical sting and quick-strike potential. This book describes the main positional and tactical themes unique to the Alekhine, and the principal directions of play in modern practice. The coverage is even-handed, and there are abundant ideas presented to both sides, including ways for White to seek to consolidate his space advantage, or else to try to blast Black off the board.
